IN THE SPECIFICATION:

Please amend the paragraph beginning at page 4, line 11, as follows.

As discussed further below in conjunction with FIG. 7, the decoded output of each automatic speech recognition system 106 is packaged with each respective confidence score and is provided back to the multicaster 104. The multicaster 104 includes a referee 105 that selects the word that seems most appropriate, based on the confidence score, in a manner discussed further below. The referee 105 returns the selected word to the client 101 for presentation to the user on the display 102.
